Malmstrom to test "Giant Voice" system on Thursday

Posted: Apr 25, 2011 11:32 AM by Malmstrom AFB

Malmstrom Air Force Base will be testing its "Giant Voice" emergency notification system on April 28, at approximately 12-1 p.m.

The system is comprised of 10 towers located across the base that are equipped to send out mass notification in case of any safety, weather, or other emergency situation.

Each tower is energized with numerous tones and chimes that will be heard throughout the area.

The periodic testing of this system is essential and ensures the operability of each tower, as well as the volume, range capability, and effectiveness of the procedure.
